

Historian Quickstart: Administrator

Course Description

The **Historian Quickstart: Administrator** online module provides an introductory overview to the Proficy Historian server and data collection components, as well as practical examples of administration and maintenance tasks performed using the Proficy Historian Administrator.

This module contains multimedia explanations of core concepts and functionality as well as step by step demonstrations of configuration and maintenance tasks commonly applied to Proficy Historian server applications.

Who should attend?

This course is designed for those who design, develop, deploy and maintain Proficy Historian applications for archiving and reporting process data.

Are there any prerequisites?

Participants should have a working knowledge of Internet Explorer, and Windows operating systems. All participants also need an account at the GE Intelligent Platforms training portal - EDGE.

What topics will be covered in this course?

The following topics will be covered in this session:

- Develop Proficy Historian applications as stand alone or networked solutions
- Create, Backup and Manage Archives
- Deploy and configure Data Collectors
- Deploy and configure Server Collectors
- Quickly and efficiently configure and manage tags
- Explain the available compression technology and how it is applied
- Apply simple techniques for effective administration, maintenance and troubleshooting
