# Historian Quickstart: Clients

Course Description

The *Historian Quickstart: Clients* online module provides an introductory overview to the Proficy Historian client components and querying techniques, as well as practical examples of design & development tasks performed using the Proficy Historian client applications.

This module contains multimedia explanations of core concepts and functionality as well as step by step demonstrations of configuration and maintenance tasks commonly applied to Proficy Historian client applications.

Who should attend?

This course is designed for those who design, develop, deploy and maintain Proficy Historian client applications for archiving and reporting process data.

Are there any prerequisites?

Participants should have a working knowledge of Internet Explorer, and Windows operating systems.   All participants also need an account at the GE Intelligent Platforms training portal - EDGE.

What topics will be covered in this course?

The following topics will be covered in this session:

- An overview of the Proficy Historian solution
- HMI Client displays and data retrieval
- Excel Add-in reporting and administration
- Querying with the Interactive SQL Client and other SQL clients
- Displaying archived data in the Proficy Portal
- Using the Proficy Historian SDK for programmatic querying and data handling
- Apply simple techniques for effective maintenance and troubleshooting

Course Length
approximately 1 hour
